♦ WISCONSIN ANNUAL SURVEY OF NURSING HOMES

This publication presents summary information from the 2000 Wisconsin Annual Survey of Nursing Homes. Nursing homes are analyzed separately from facilities for the developmentally lisabled (see Notes). Wisconsin had 419 licensed nursing homes and 45,978 licensed nursing home beds in 2000. On December 31, 2000, there were 38,381 residents in Wisconsin nursing homes.

ADDITIONAL INFORMATION

The source of data for these tables is the Annual Survey of Nursing Homes, conducted by the Wisconsin Division of Health Care Financing, Bureau of Health Information, in cooperation with the Division of Health Care Financing, Bureau of Fee-for-Service Health Care Benefits; the Division of Supportive Living, Bureau of Quality Assurance; and the state's nursing home industry.

Beginning with the 1999 data year, reports based on this annual survey analyze nursing homes separately from facilities for the developmentally disabled (FDDs). Nursing homes (see HFS 132) comprise skilled nursing facilities (SNFs), intermediate care facilities (ICFs), and institutions for mental diseases (IMDs). Because reports from years before 1999 did not exclude FDDs from the analysis of "nursing homes," they are not comparable to this year's report.

More detailed information on Wisconsin nursing homes and their residents can be found in the report, *Wisconsin Nursing Homes and Facilities for the Developmentally Disabled, 2000.* Agency-specific information can be found in *Wisconsin Nursing Home Directory, 2000.* To receive copies of these publications, call Joan Gugel at (608) 267-7955.
